Short Description

A pressure die cast brass double boat hook end piece, available in a polished brass and chrome plated finish.

This pressure die cast brass boat hook end is designed to be fixed on to a suitable 34mm diameter pole. Commonly, a timber pole is chosen as the best solution. The hook is then fastened to the pole with a grub screw.

Boat hooks are an essential on board a yacht, offering a safe way to rescue overboard lines, or even items. This die cast brass product is perfect for more classic craft.

This product is pressure die cast by Foresti & Suardi in Italy and is available in natural unlacquered brass or chrome plated brass. Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this are amongst the core products manufactured since those early days. The tooling may have been updated, and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
