Short Description

A flush drain fitting with stainless steel grid and threaded brass tube, available in two sizes.

This drain fitting can be used in interior or exterior settings. With a 316-grade (A4) stainless steel lid in a mirror polished finish, the product is highly resistant to corrosion and is therefore suited to harsh environments such as marine or coastal application. The item is commonly used as a deck drain on board a yacht.

The product is offered in two sizes with 1 1/4" BSP and 2" BSP connections.
