Short Description

We offer a completely custom backlit lettering service. Our LED letters or logos are constructed from acrylic and are faced with 316 grade stainless steel (3mm). There are multiple fixing methods available dependent on the shape of the installation surface including 3M tape and stud fixing.

- AISI 316L stainless steel backlit lettering
- LED 12 or 24vdc
- IP68
- Available with static colour or full RGB colour change
- Finishes other than polished stainless steel also available

This is a custom product and is therefore priced on a job by job basis. Please contact us with your requirements for a free no-obligation quote.
