Short Description

Vetrofreddo® sink available in white.

The *Rettangolare S* compact countertop basin is the perfect solution for small spaces. Made from cold glass, the product has a unique matt look and feel with a soft-touch texture. The basin does not feature a waste plug as it is intended for handwashing and other similar uses. Instead, the basin has a drain cover made from the same Vetrofreddo® material.

Description

VetroFreddo® - Cold Glass

VetroFreddo® is an innovative material composed of glass pigments and resin. Its key characteristics are its versatility in adapting itself to any form or shape imaginable. The material's unique characteristics are expressed through the soul of its colour, which can be in clear, semitransparent or opaque form, due to the material composition of glass pigments. No limits exist in regards to colour. Apart from the existing range of colours, any colour from the "RAL" colour scheme can be chosen on request.

VetroFreddo® is temperature resistant up to approximately 100°C and can be worked with and carved just as marble or glass. All objects designed with the material VetroFreddo® can be cleaned with any type of non-granular soap, using soft sponges or tissues. In case of superficial damage (scratches), the damaged area should gently be rubbed with a sheet soaked in olive oil. In case of deeper scratches or damage, a special replacement glass paper is available from the manufacturer for every colour and type of object.
