Short Description

This unique product has beedn designed to be as discrete as possible when not in use. The Serpens retractable reading light simply 'disappears' neatly into its base and can be pulled out and used as a convenient flexible reading light only when needed. In a small area where care and attention has been paid to keeping the interior design as clutter-free and unobtrusive as possible, this product offers an excellent solution for reading in the hours of darkness.

The Serpens retractable reading light can be switched on or off at any point of extension and can therefore double up as a neat feature light when operated in its retracted position. A separate switch is required to control the light.

The product is made entirely from marine-grade materials and features a 3 Watt LED module in 4000°K.

- Retractable reading light with flexible stem
- Power LED 3 Watt module in 4000°K
- Marine-grade construction
- Dimmable
