Short Description

Plastic push button mechanism.

This Foresti & Suardi push button mechanism is compatible with our complete range of knobs & ferrules except the *mini* models which are supplied complete with their own small mechanism. The mechanism is secured to the rear of the door panel, the threaded male spindle passing through the appropriate through hole in the panel. The mechanism is fixed with 2x 3.5mm (No.6) panhead screws which can be purchase separately from the related product section below.

The mechanism is offered in a number of different finishes to suit a broad range of interior styles.

- All mechanisms supplied complete with a matching 90° plastic striker plate.
- Compatible with our complete range of knobs and ferrules.
- Four different colours available.
