Short Description

A recessed pressure die cast brass tank breather vent with anti-flame gauze.

This air vent or breather can be supplied in a polished brass or chrome plated finish and features a Ø22mm hose connection. Tank vents are designed to help maintain a stable pressure within a storage tank. This helps during fuel use and refuelling, allowing air to enter and escape the tank.

Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this breather are amongst the core products manufactured since those early days. The tooling may have been updated and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
