Short Description

45200SC push button suitable for panels of 23mm

Enhance the look of your cabinetry with the '45200SC' push button, expertly crafted from solid brass and finished in a stylish satin chrome. Designed to suit cabinets with a panel thickness of 23mm, this premium hardware ensures both durability and a sleek, modern appearance.

Manufactured in Italy by the esteemed Foresti and Suardi, this push button combines Italian craftsmanship

with reliable performance. It is compatible with the 3095*, 30981*, and VD88000C mechanisms, making it a versatile and functional choice for a range of cabinet styles.

Priced to clear as a non-stocked finish, the '45200SC' push button offers an excellent opportunity to acquire high-quality, Italian-made hardware at an exceptional value.

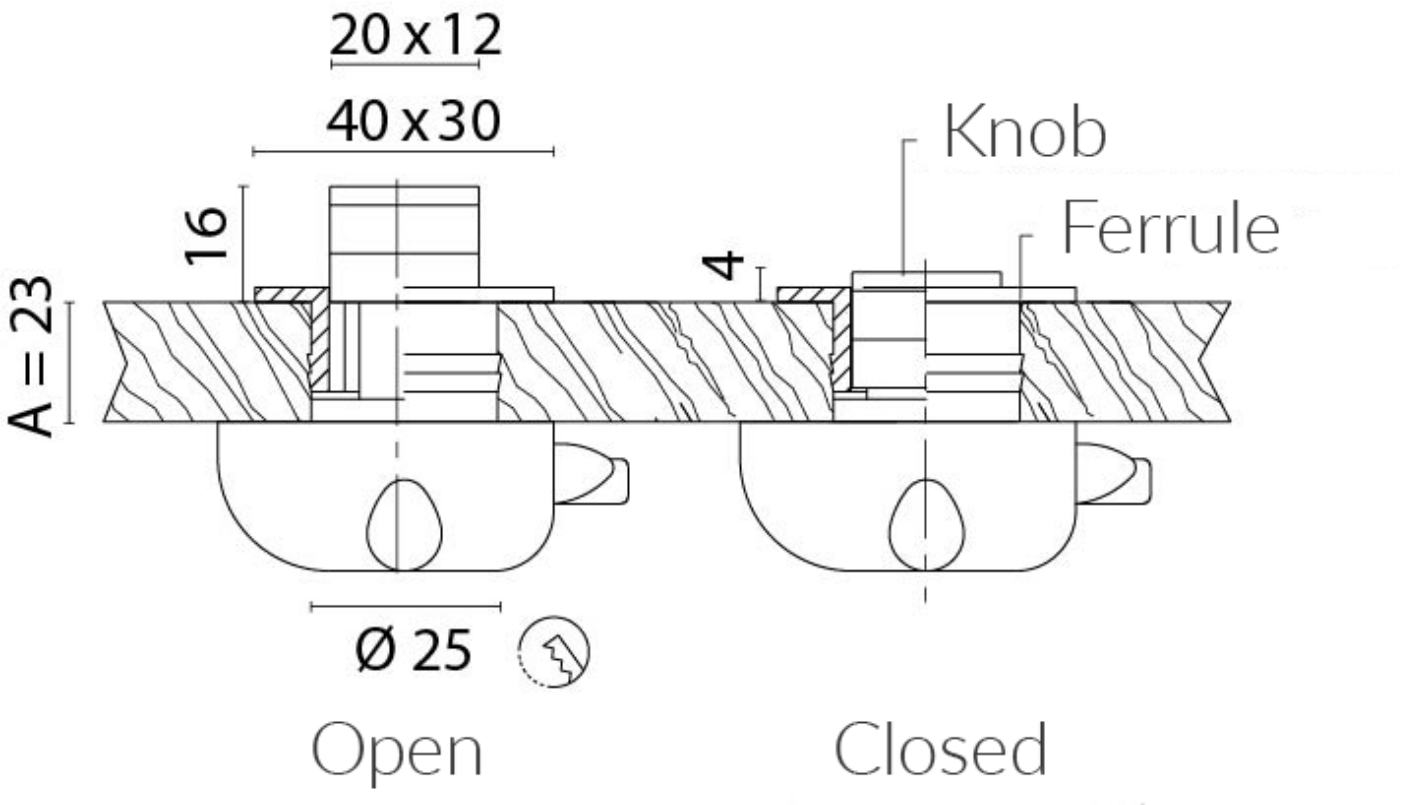

Key Features:

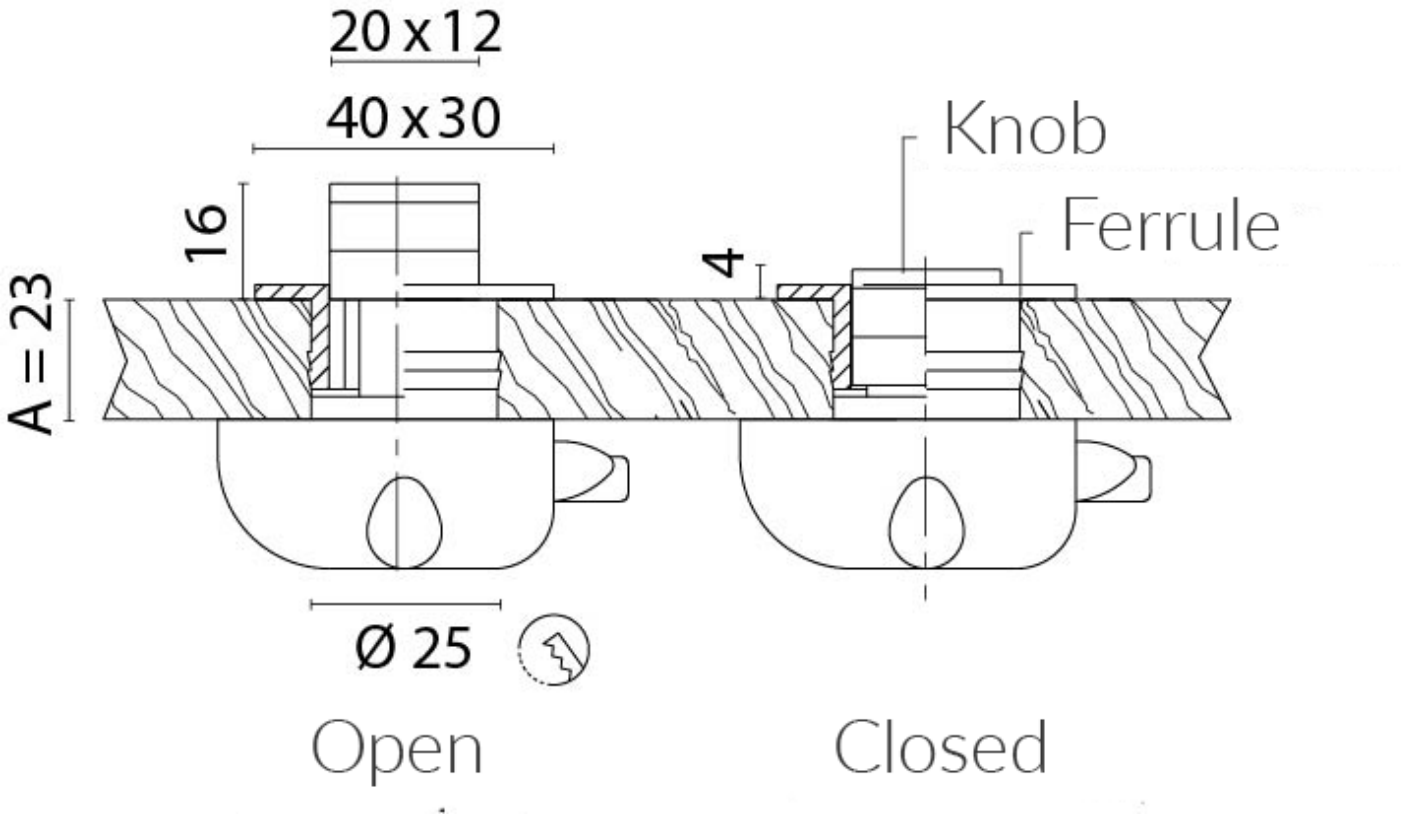

- Made from solid brass with a satin chrome finish
- Suitable for cabinet panel thickness of 23mm
- Manufactured in Italy by Foresti and Suardi
- Compatible with 3095*, 30981*, and VD88000C mechanisms
- Priced to clear as a non-stocked finish

Upgrade your cabinetry with the '45200SC' push button for a blend of style, functionality, and lasting quality.
