Short Description

A pressure die cast brass deck filler with retractable handle.

- Available in either a polished brass or a chromed brass finish.
- Comes in 2 sizes as standard.
- Features the word fuel, water, diesel, gasoline or waste engraved in lid.
- 30° angled hose connection.
- The lid is connected to the filler with an internal safety wire so that once opened it cannot be dropped over-board.

On request this product can be supplied in a Bruniton finish. Bruniton is a process similar to PVD, where a substance made up of particle of PTFE (Teflon) are bonded onto the surface of a component under high pressure. The finish is very durable and suitable for exterior marine applications (available in matt black only).

Additional lids can be purchased on request.
