Short Description

Pressure die cast brass toggle fastener in a brass finish.

Used to secure a door, locker or storage box, this pressure die cast toggle fastener features a latching counter plate designed to be installed on the same plane as the latch. 4x No.6 3.5mm countersunk screws are required for the installation of the product which are available to purchase separately; please view the related products below (316-grade stainless steel only). The toggle fastener is available in either a polished unlacquered brass or a chrome plated brass finish.

Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this toggle fastener are amongst the core products manufactured since those early days. The tooling may have been updated and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
