Short Description

A grab handle made from mirror polished Ø22mm stainless steel tube.

This stainless steel grab handle is made from 316-grade stainless steel. Grab handles provide essential security onboard and are especially recommended on fast craft. The '2194' series handle is sold in a choice of stud (via M8 bolt, not included) or screw fixing and is available in 7 lengths.

Please note screws or bolts are not supplied with our handrails but can be purchased separately from the related products section below. The handle requires 4x countersunk 3.5mm No.6 screws for the screw fixing variant and 2x M8 screws for the hidden stud fixing variant.
