Short Description

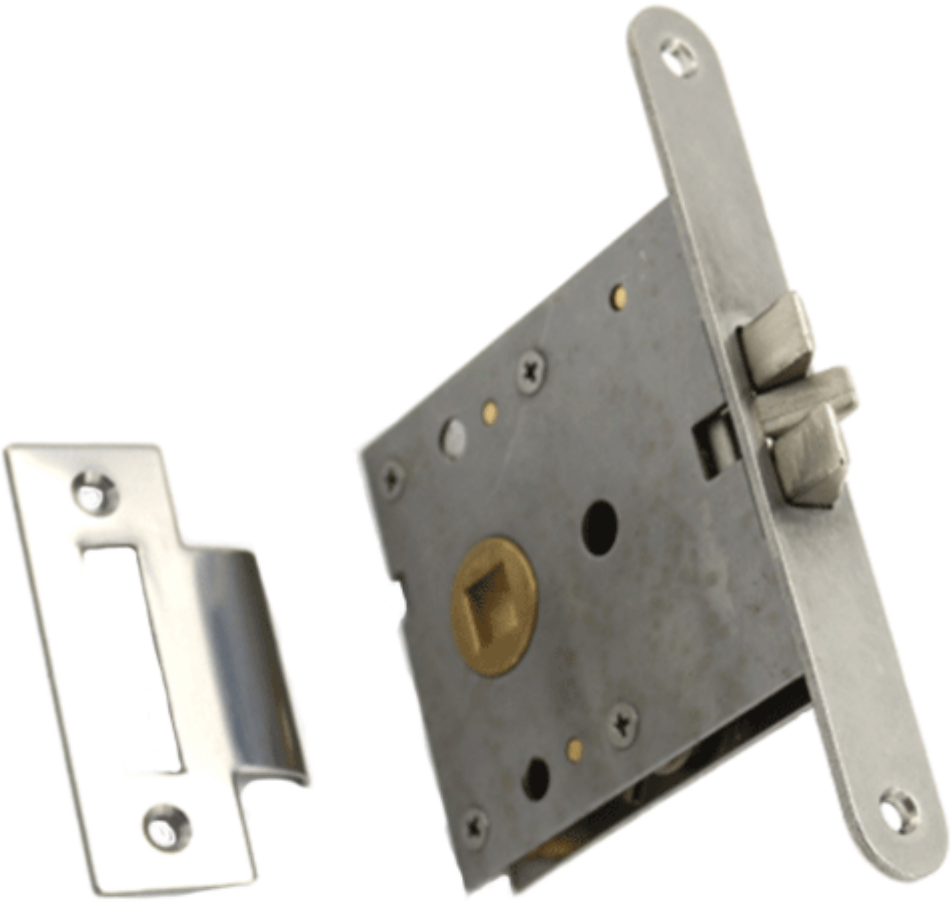

A anti-rattle mortise latch lockset consisting of our 409732C rim latch and our 509500SS handles. This lockset is enabled with a pin activated handle lock mechanism, making it ideal for use where a simple privacy function is required. The latch is a chrome-plated brass finish and has a universal door handing design.

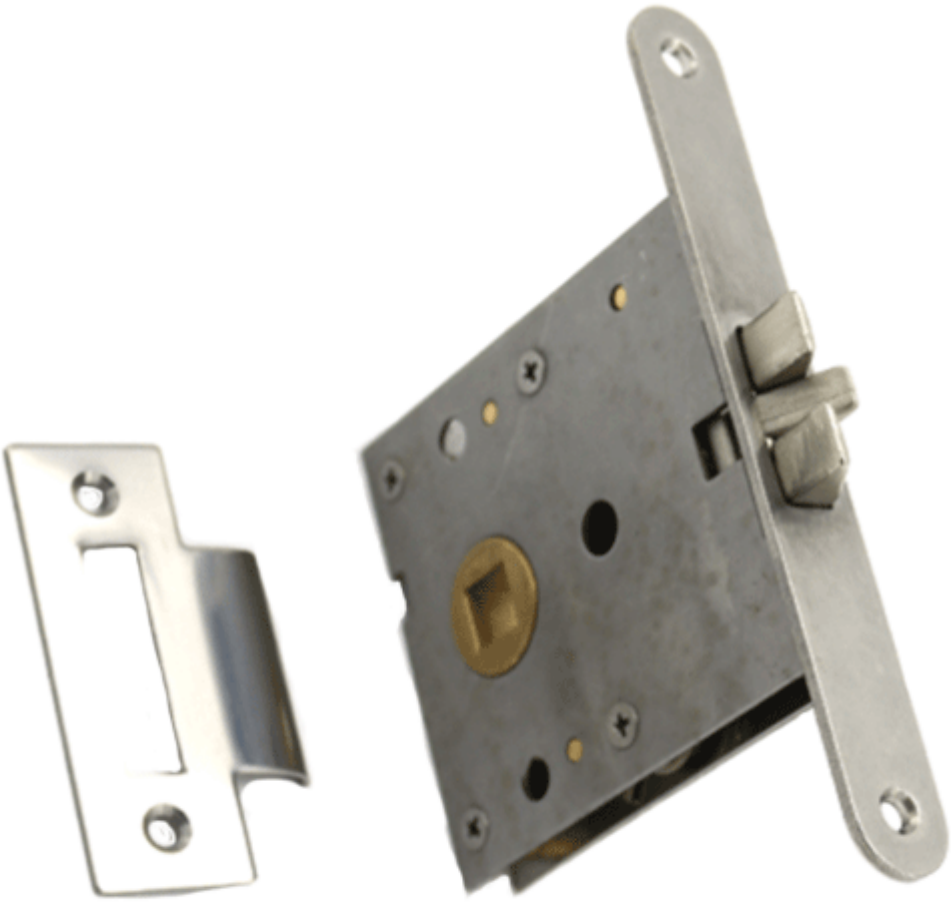

This lockset is supplied with 316-grade stainless steel handles, designed to withstand the harshest of environments. These handles have a compact and minimalist design, suited to applications where a bulky or heavy handle is best avoided.
