Short Description

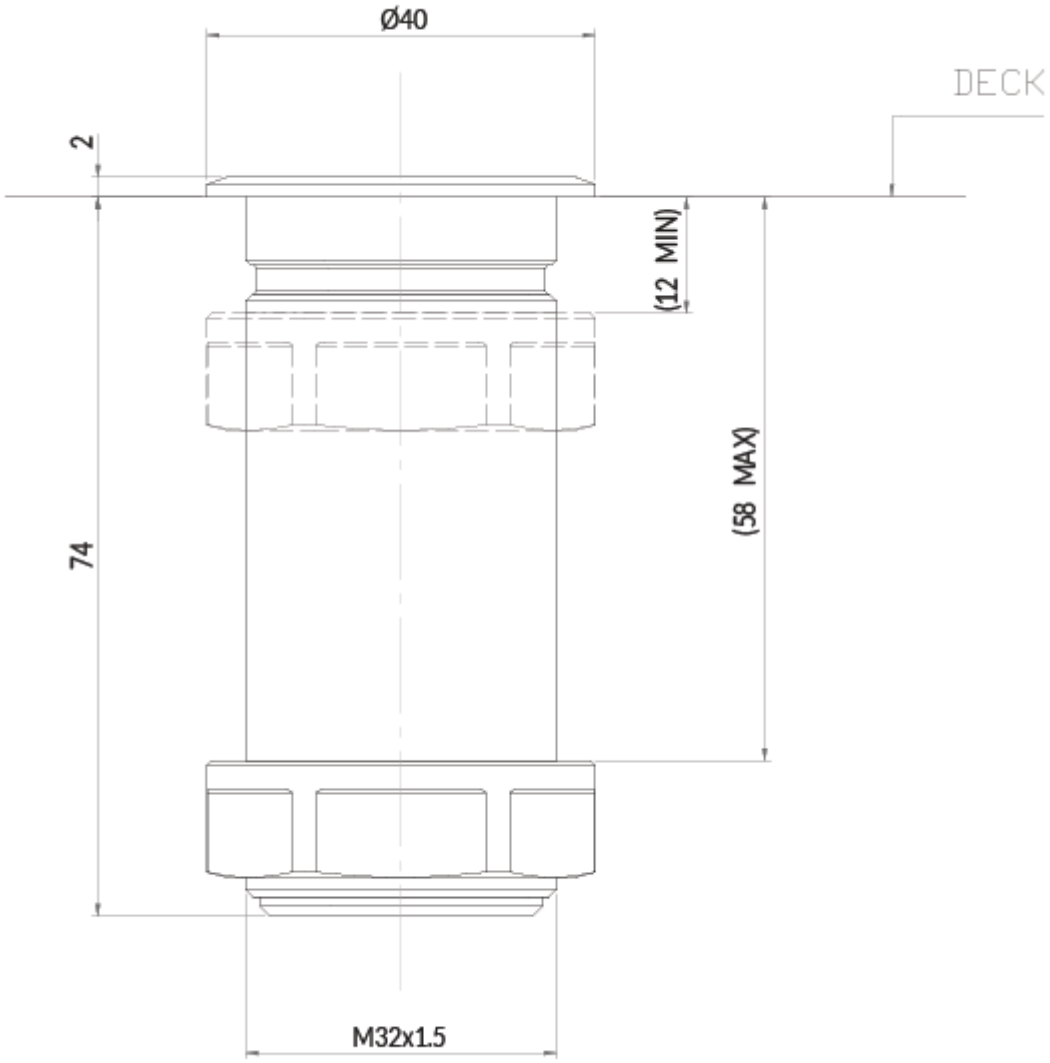

Our stainless steel *Quick Lock* securing system is an excellent solution for simple and strong removable padeyes or other applications. The system is available in a number of sizes and working loads, this product being the M32 x 1.5mm deck socket for the Q32 series. Various plug-in accessories are compatible with this deck socket such as padeyes and a threaded male plug for other applications, please check related products.

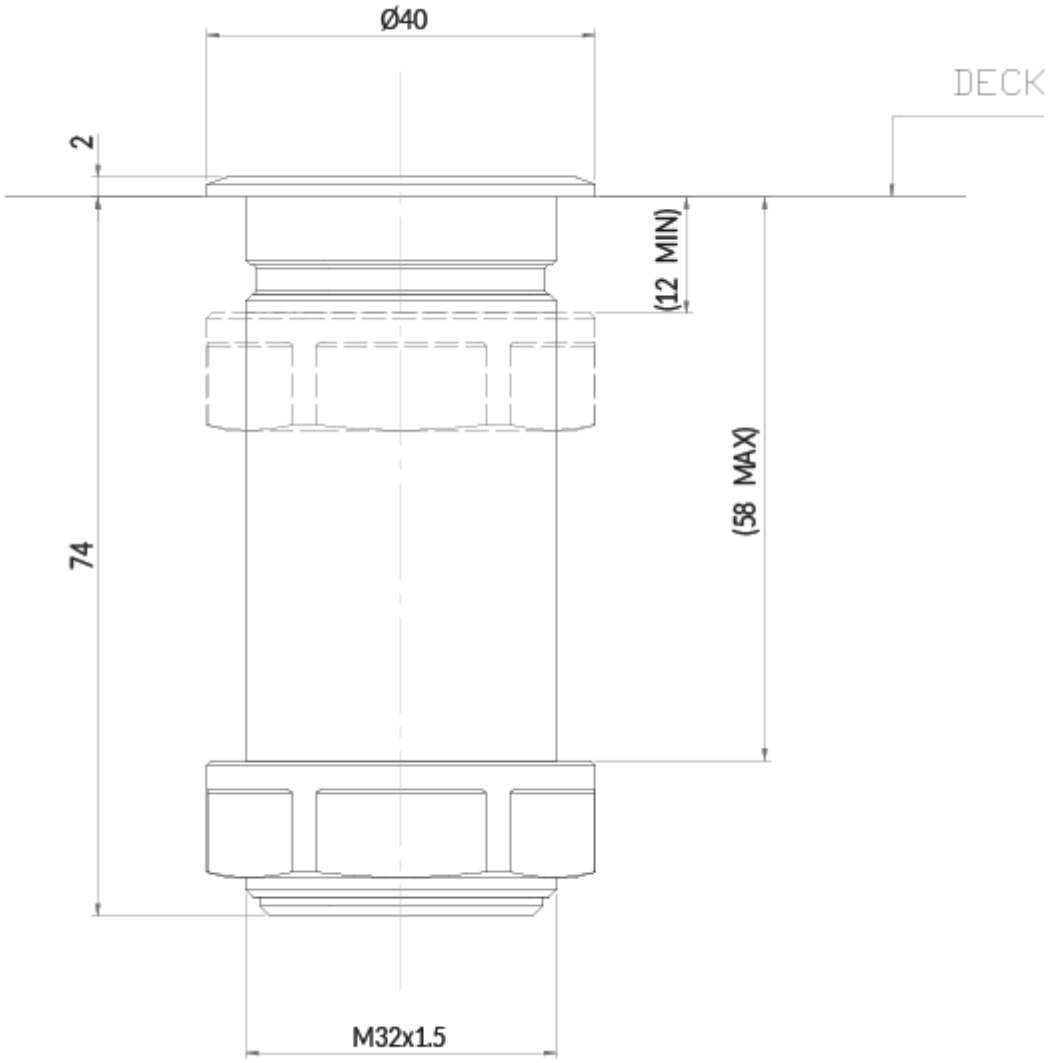

The socket is waterproof and therefore does not require any drainage. The sokect is supplied in a polished stainless steel finish but can be also supplied in a satin stainless steel finish on request or even machined

from grade 5 titanium.
