Stainless Steel Sliding Shower Rail

£627.38
Excl. Tax: **£522.82**

Product Images

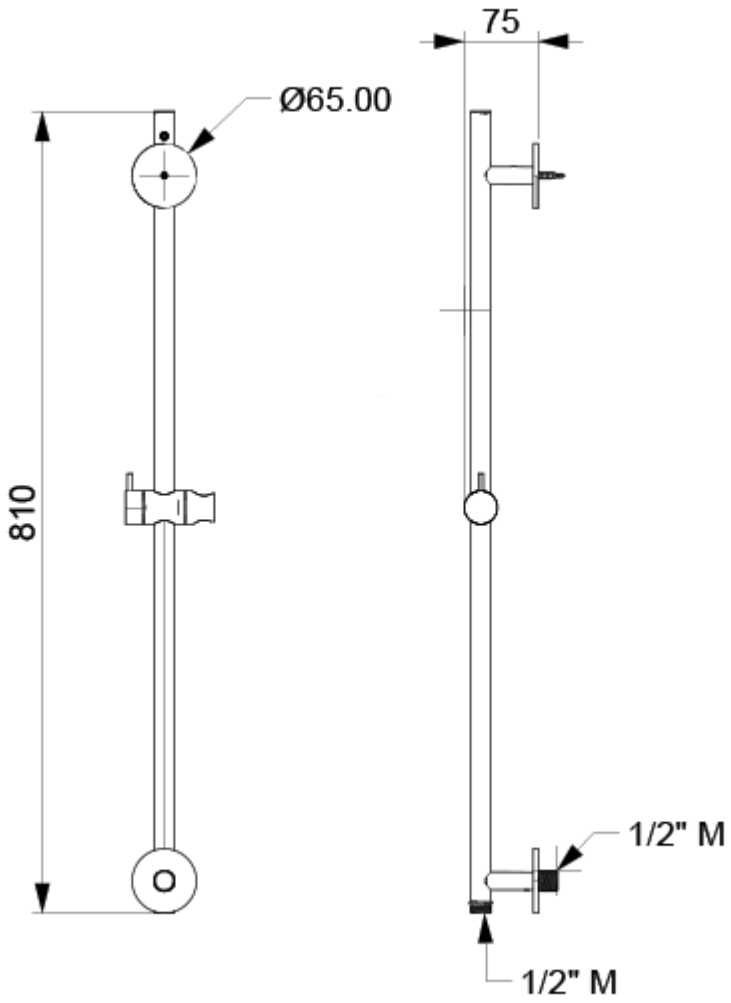

Short Description

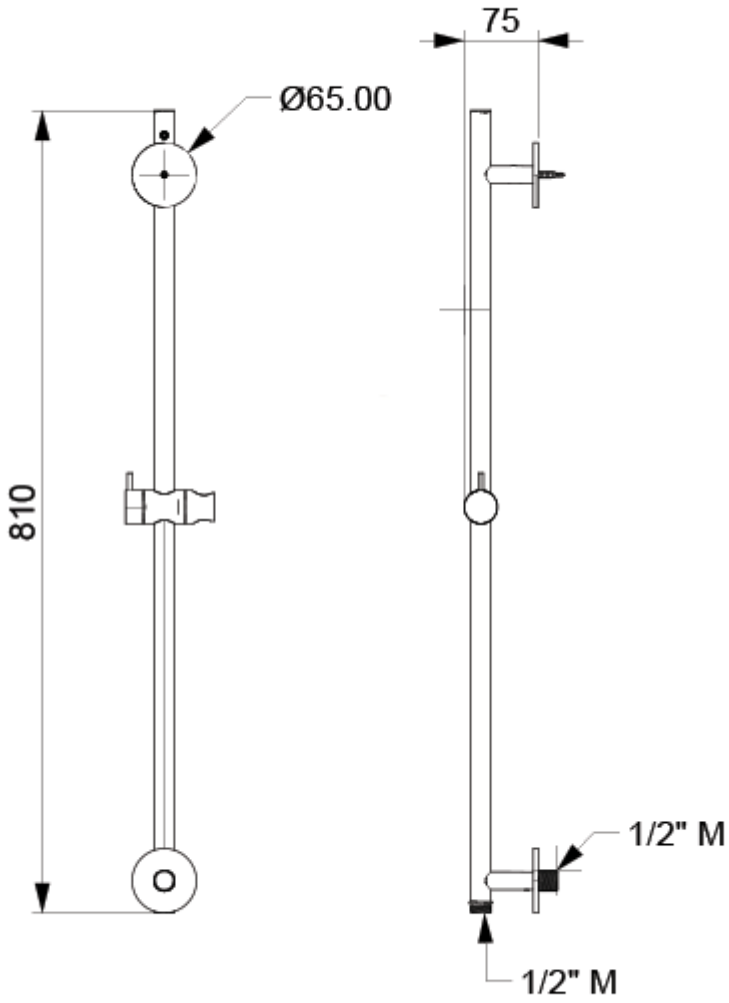

A sliding rail wall shower kit with integrated water feed. This elegant sliding shower rail is made from 316-grade stainless steel and is therefore sutiable for both interior and exterior installation.

Marine-grade stainless steel is not only highly resistant to corrosion, but it also helps prevent bacteria build-up and therefore offers a more hygenic solution over a brass product. It is also completely lead-free.
