Short Description

Forged carbon fibre retractable deck cleat in three different sizes. The cleat features a smooth and strong action and titanium shafts for durability and performance.

- Screw fixing from above deck (fixings sold separately)
- Smooth edge design for safety on deck
- Lightweight and strong forged carbon fibre
- High load capacity
- No drains required - watertight shafts
- Backing plate available on request

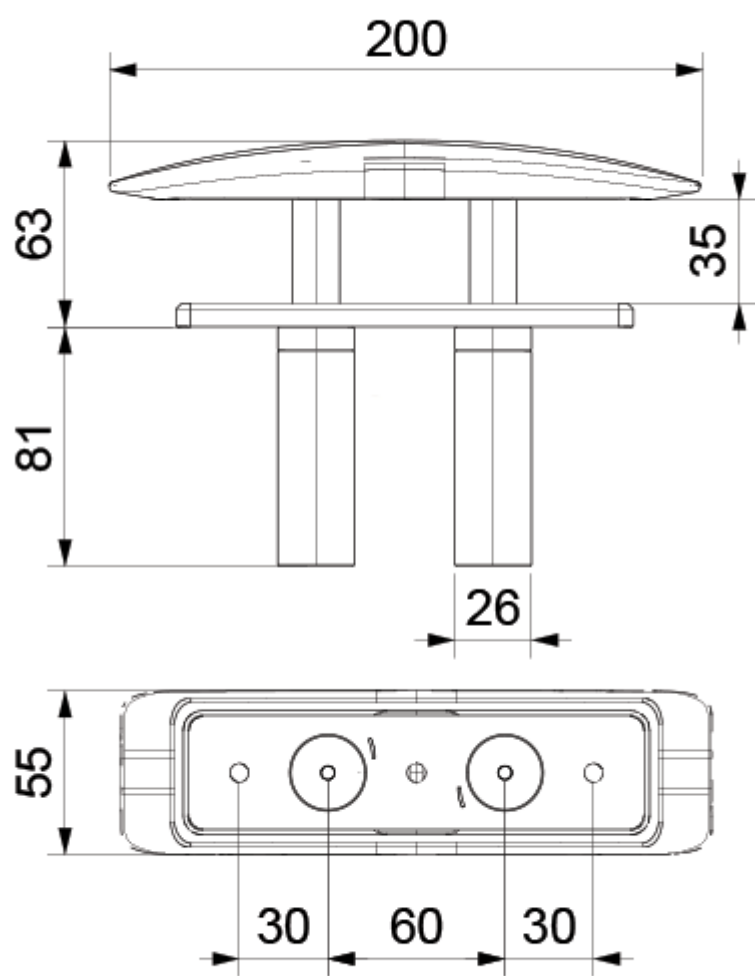

Description

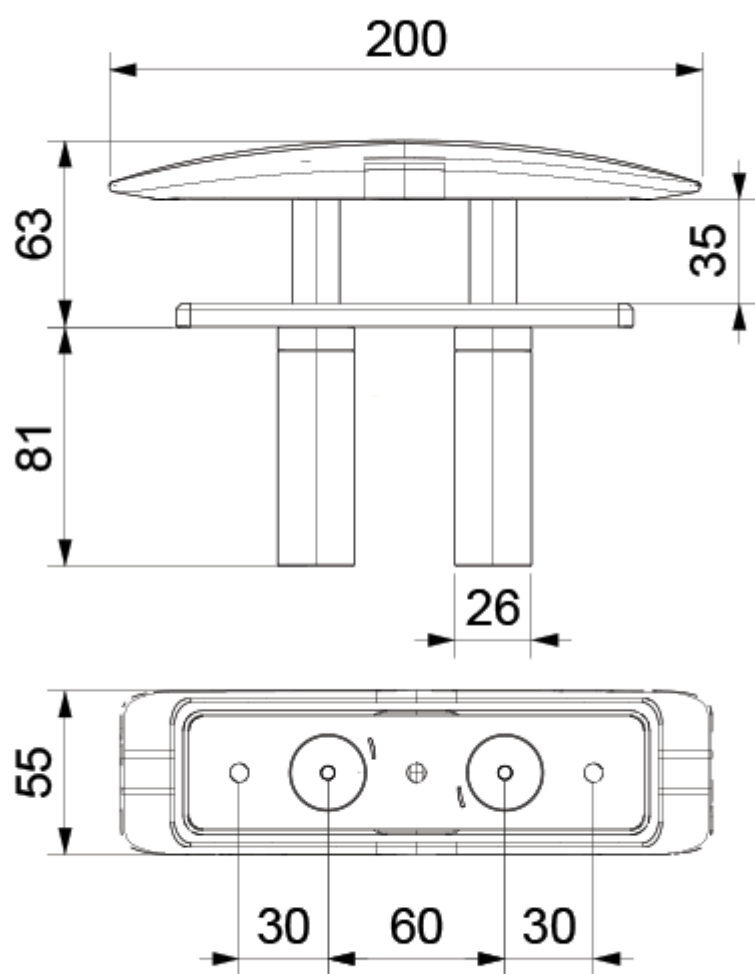

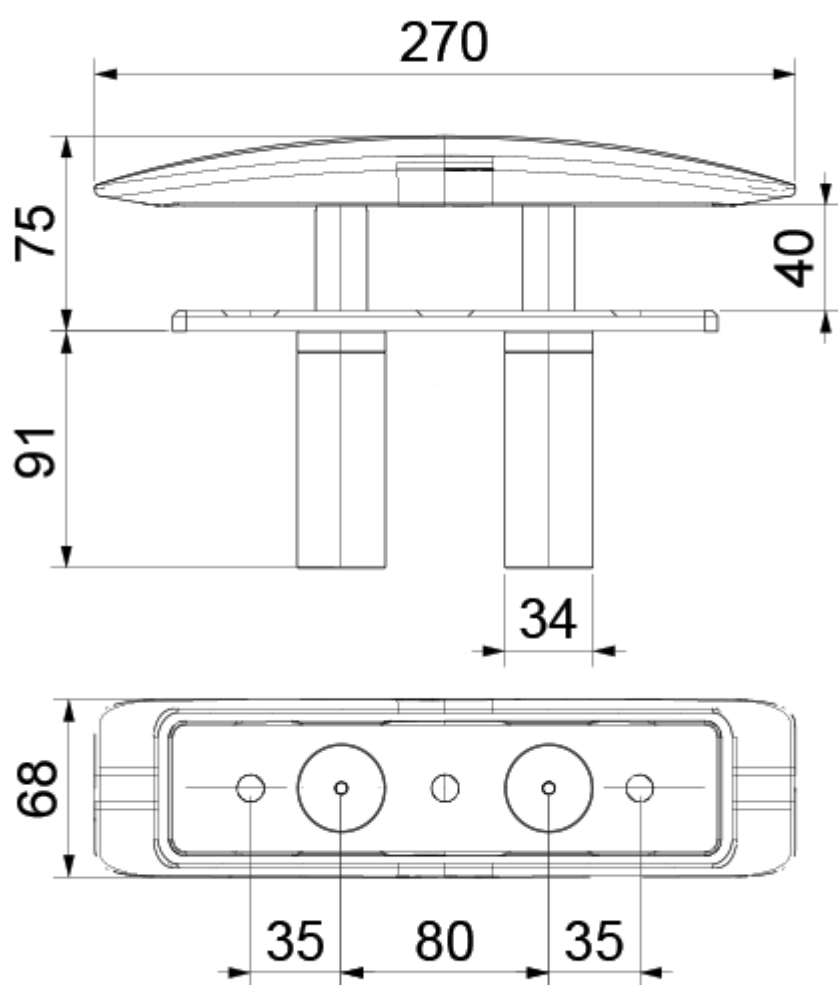

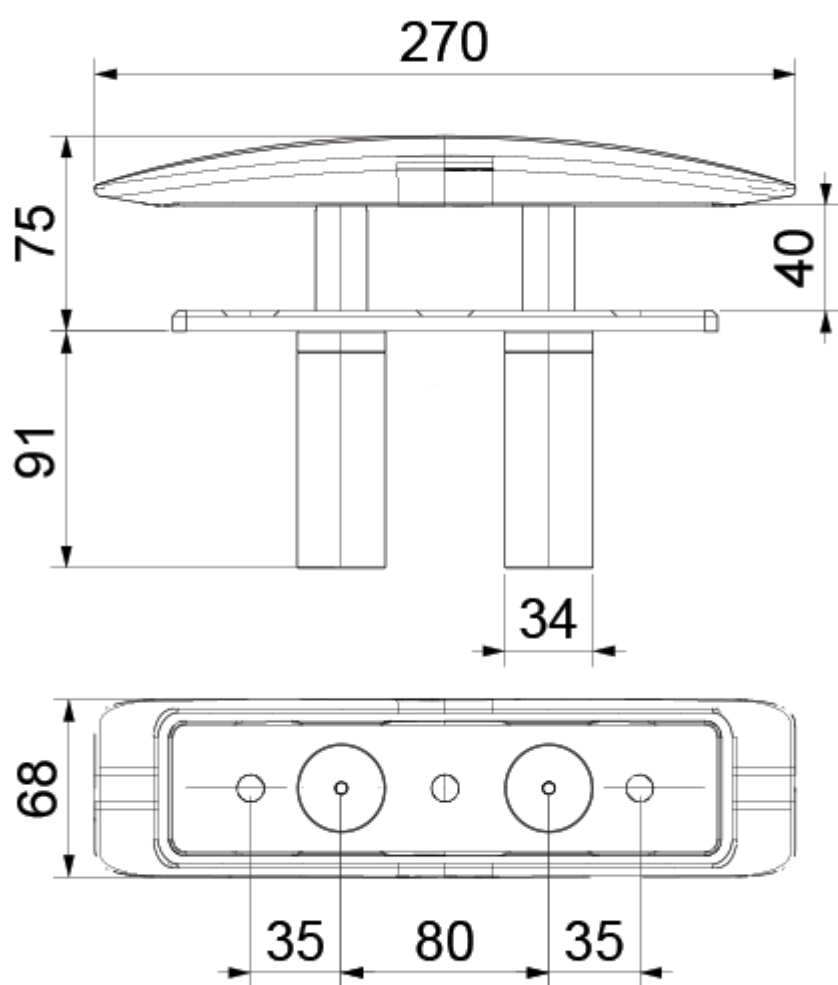

Sportiness & Innovation

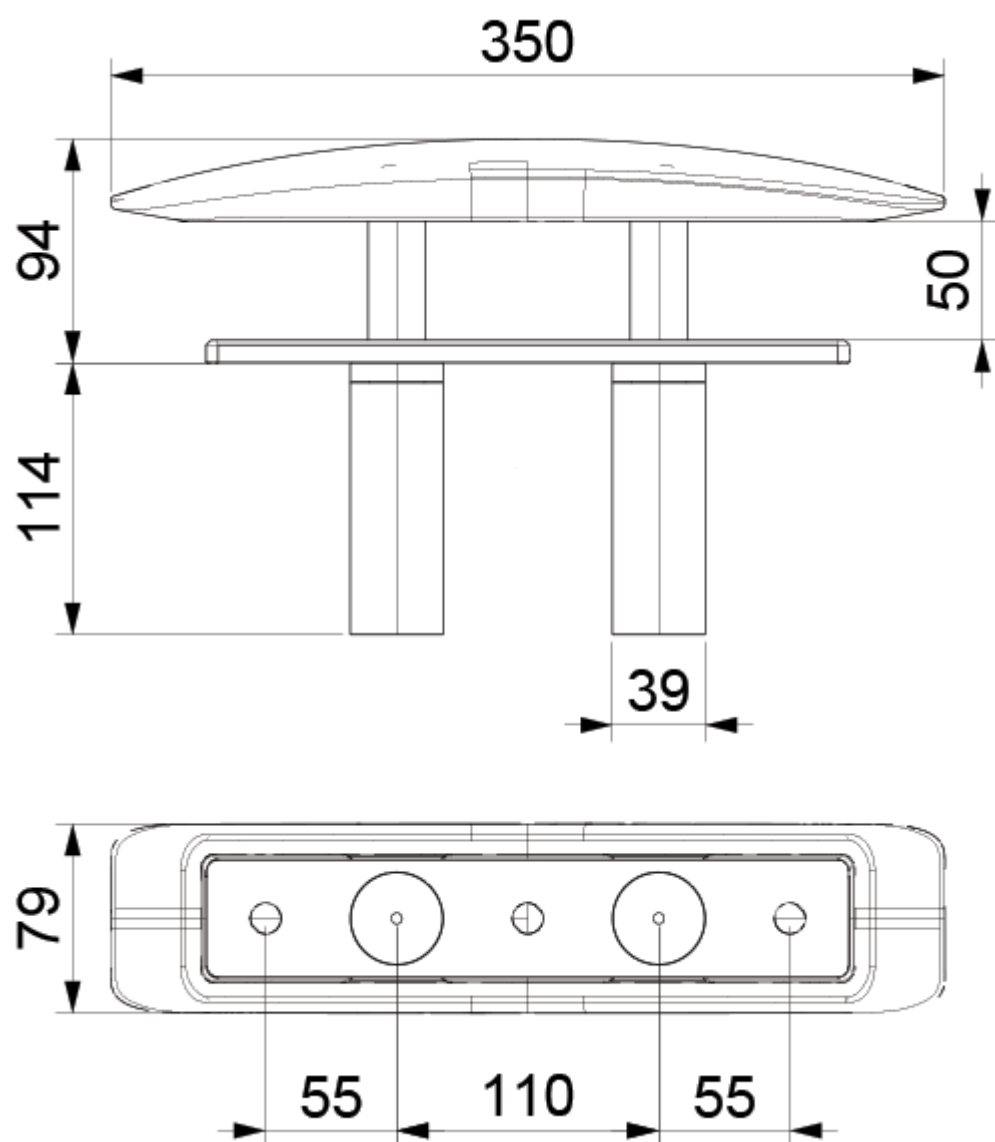

This retractable cleat is not only a beautiful addition to any deck but also an excellent lightweight choice. The forged carbon construction is incredibly strong and, combined with titanium shafts, it offers a no-compromise solution for those seeking ultimate performance. Effortlessly lowering when not required, the cleat helps to keep the deck clear from trip hazards. Viton™ seals ensure water can never pass through the cleat's shafts. The cleat is available in three different sizes and has a high load rating.

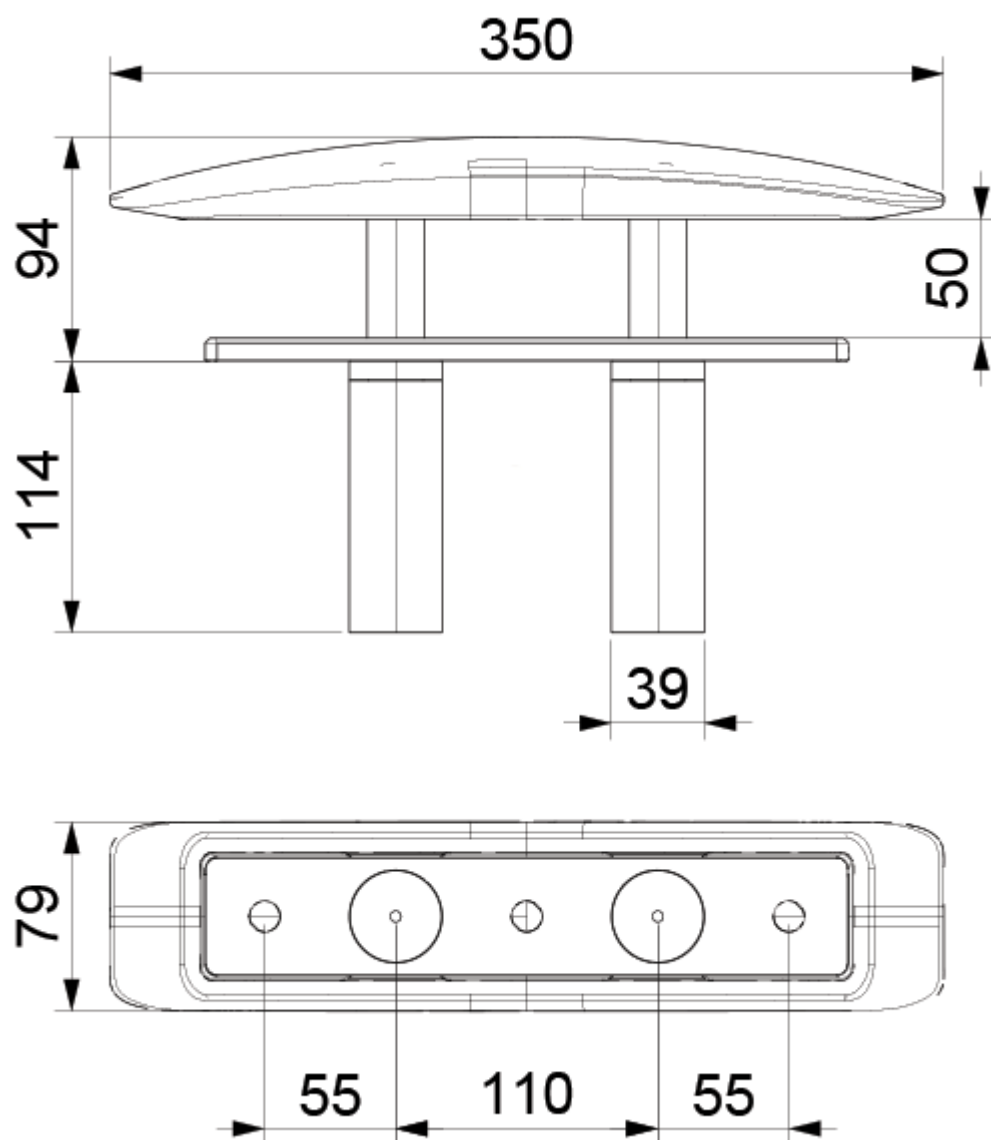

Code	Length (mm)	Depth (mm)	Weight (kg)	Working Load (daN)
IC-CC200	200	55	0.5	2200
IC-CC270	270	68	1.1	4000
IC-CC350	350	88	2.0	6000
