Short Description

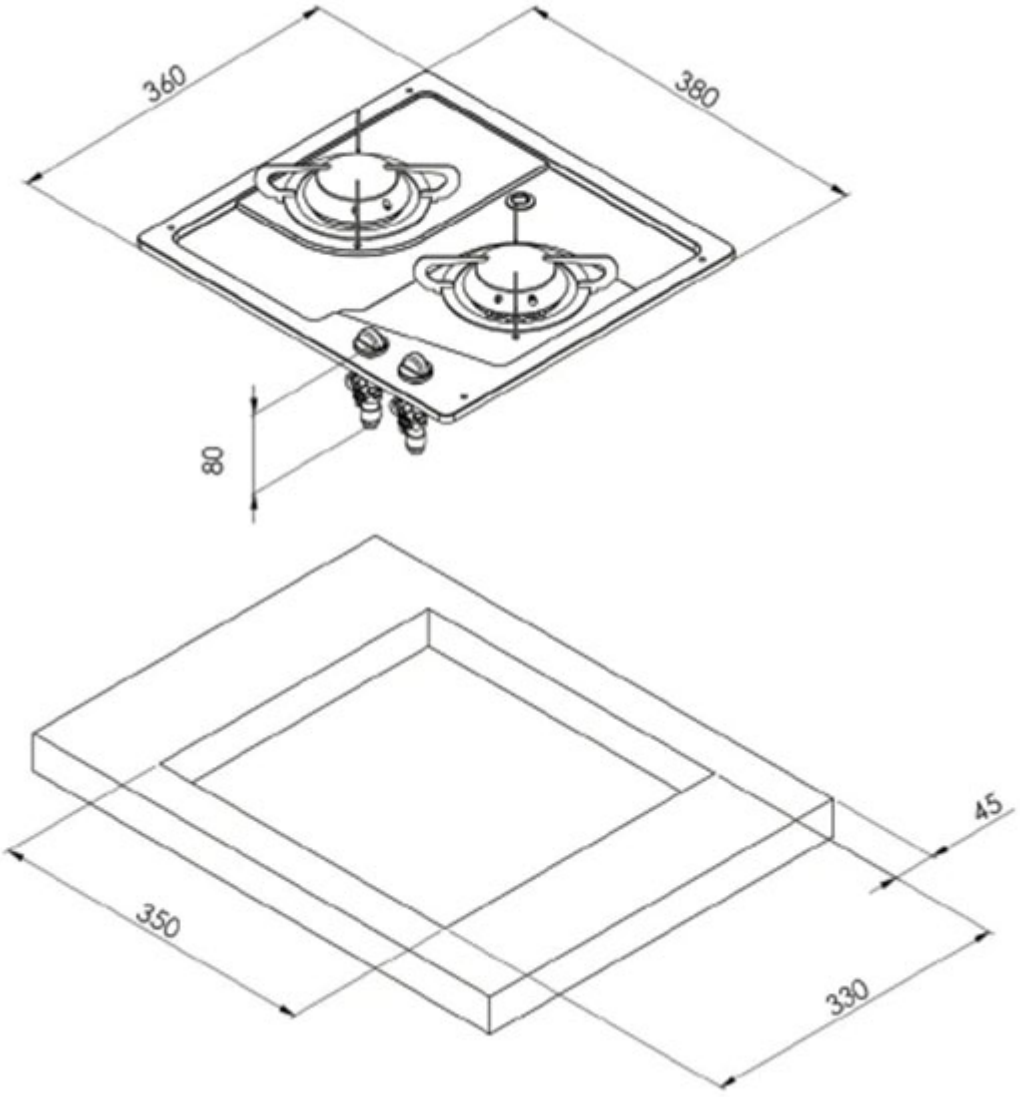

Stainless steel double gas burner hob with automatic ignition

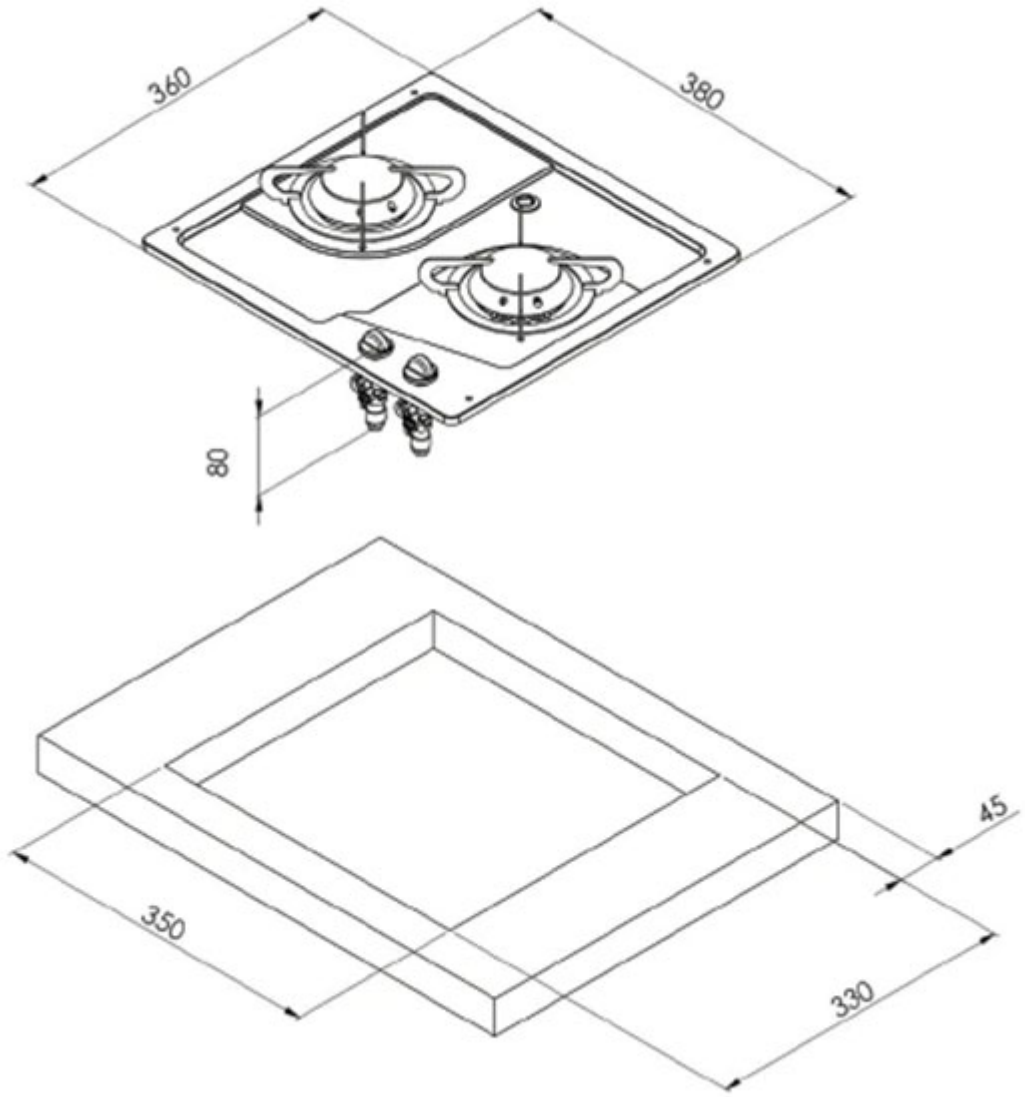

This high-quality double burner gas hob, made in Italy by Can Srl, offers excellent performance and reliability for your cooking needs. Crafted from durable 304-grade stainless steel, this compact hob features two semi-rapid burners: one with a 1.75 kW capacity and another with 1.0 kW.

It also includes automatic ignition, allowing you to easily light the flame with the push of a button, eliminating the need for matches or lighters. Safety is a priority with its built-in thermocouple, which automatically stops the gas flow if the flame goes out. Ideal for boats, camper vans, and other mobile kitchens, this hob is priced to clear as it is no longer part of our regular stock.
