Short Description

Pressure die cast brass barrel bolt. Available in either a polished brass or chromed brass finish.

This barrel bolt is ideal for adding additional security or privacy to a door. Barrel bolts are easy to use and simple to install. No cut-outs in the installation surface are necessary, the bolt element being screwed to the door face and the keep to the outer frame. Once the bolt is engaged in the keep, the bolt can be rotated to secure it in place. This particular barrel bolt design is available in two sizes as well as a chrome plated or natural brass finish.

Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this barrel bolt are amongst the core products manufactured since those early days. The tooling may have been updated and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
