Short Description

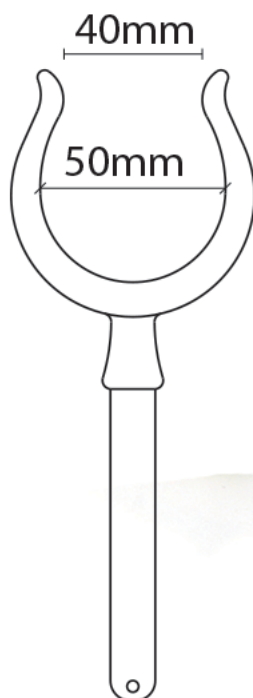

2500 hinged rowlock in die-cast brass

The '2500' rowlock is expertly crafted from pressure die-cast brass and is available in both a polished brass and chrome plated finish. Its design features a hinged mechanism that allows it to fold away conveniently when not in use, eliminating the need for a separate socket.

This practical and stylish rowlock is an ideal solution for those seeking both functionality and aesthetic appeal in their hardware.

This product is pressure die cast by Foresti & Suardi in Italy and is available in natural unlacquered brass or chrome plated brass. Foresti & Suardi have been manufacturing pressure die cast brass marine hardware since 1961. Fittings such as this are amongst the core products manufactured since those early days. The tooling may have been updated, and technology has moved on a great deal, but these are the heritage pieces that established the reputation of Foresti & Suardi, as well as Timage, in the global yacht accessories market.
